NATURALLY INSPIRED The rich earth tones and authentic texture of Cedarwood aluminum siding readily summon the warmth and simplicity of gracious living. Cedarwood's convincing wood-like appearance is the result of our patented Color Fusion coating process. Intertwining natural hues in non-repeating patterns create the beautiful variegated tonal coloring of genuine cedar. As distinctive as each tree in the forest, this unique finish will singularly define your well-appointed home.

Beautifully Protective

Cedarwood's exquisite appearance is as strong as it is beautiful. Beginning with a heavy-duty aluminum core, each panel is "weather-sealed" in a resilient Kynar® PVDF coating specially formulated to resist staining, mildew and dirt.

This best-in-class design and construction make Cedarwood an excellent choice for all-weather protection. Frigid temperatures, searing sun and blasting winds are no match for its commanding strength. Cedarwood also is warranted against excessive chalking or color change for 25 years – further assurance that your home will look great for years to come.*

Easy to Maintain

You can forget about struggling with ladders and time-consuming upkeep. Cedarwood aluminum siding is easy to maintain. Unlike fiber cement that may require periodic recaulking and repainting, or wood siding that typically needs repainting every five to seven years, Cedarwood demands not much more than a simple rinse with a garden hose – ideal for today's lifestyle.

Environmentally Friendly

Did you know that all Gentek aluminum siding products are produced from material that is at least 90% recycled aluminum? At the end of its long useful life, aluminum siding is 100% recyclable and can be recycled back into similar products with no loss of quality. Using recycled aluminum instead of raw materials also reduces the generation of air pollution such as carbon dioxide (CO₂), sulfur dioxide (SO₂) and nitrous oxide by 95% and water pollution by 97%.¹ Eco-friendly Cedarwood aluminum siding further helps the environment because it never needs to be repainted, thereby reducing the amount of paint and other maintenance-related substances entering the waste stream.

Investing in Your Home

Like many people, your home may be your most important investment. Cedarwood's easy upkeep and attractive appearance can enhance the curb appeal of your home while improving its overall value. And in today's resale market, a beautiful, low-maintenance exterior can be an important amenity.

Built Weather-Tough!

Cedarwood aluminum is performance-engineered to shield your home from outdoor elements, such as harsh winds and water, and other destructive weather. Unlike wood, compressed particle board or fiber cement, Cedarwood won't absorb moisture.

Added Dimension

The extra-deep 1/2" butt height of Cedarwood aluminum siding adds greater dimension and style with dramatic shadow lines.

Superior Finished Look

While fiber cement and compressed particle boards typically require caulked joints, Cedarwood's "seams" are crisp and clean.
