

## PICTURE WINDOWS

Picture windows allow a generous infusion of natural light, while protecting your home with a weathertight shield.

- Fusion-welded mainframe for added strength and energy efficiency
- 1" thick insulated glass unit with warm-edge spacer system technology increases energy savings
- Multi-walled extrusions provide superb welding strength and structural integrity
- Narrow sightlines for an attractive design and unobstructed viewing area
- Multiple configurations are available
- Add special shape windows and fixed lites to create an expanded window design
